

# Felipe Orlando

Software Engineer, Tech Leader, Entrepreneur

A Software Engineer on demand from Brazil with almost 10 years of experience on both back-end and front-end web development. High experience with Javascript, React and Ruby on Rails ecosystems.

## EXPERIENCE

### Senior Software Engineer at Y Media Labs

May 2021 — Present

I'm working as a Senior Software Engineer in different kinds of projects, like web applications, microservices and mobile apps. Usually using technologies like Node, React, GraphQL, React Native, Go.

### Senior Software Engineer at BossaBox

December 2020 — May 2021

I've worked as a Software Engineer on the staff team, dealing with all the internal systems and sometimes with the clients' projects. Our stack was based on the following tools: Typescript, Node, Koa, Serverless, Vue, MongoDB and AWS.

### Senior Software Engineer at BitcoinTrade

November 2019 — December 2020

Worked as a Software Engineer at BitcoinTrade and its related companies. My principal focus was on the trading platform - the core product for the company - crafting new features and improving the existing ones. I used technologies like Typescript, Go lang, Mongo, Websockets, React, Redux, ReduxSaga and Styled Components.

### Tech Lead at Quero Education

April 2019 — November 2019

I had started my job at Quero Education as a Software Engineer and was promoted to Tech Lead. I had worked as tech leader, making technical decisions with the team, maintaining the best code practices and developing new features and microservices with the following technologies: Typescript, Rails, Elixir,, AWS, Nest.js, TypeORM.

### Senior Software Engineer at VTEX

January 2019 — April 2019

I have been part of Indeva (a VTEX company) helping the company to rebuild the front-end stack, beginning with the new style guide and implementing GraphQL on the app. The stack includes React, Jest, Apollo, GraphQL, Ruby on Rails.

## CONTACTS

+55 12 99137-8184

## SKILLS

Node web applications

Python web applications

Ruby on Rails ecosystem

React (web and native) ecosystem

Typescript on front and back

Go Lang microservices

Serverless applications

AWS and GCP experience

Technical leadership

## HOBBIES

Unreal Engine, books, tv shows, games and travel.

### **Senior Software Engineer at Creditas**

August 2018 — January 2019

Worked in a remote squad for a Brazilian startup that has revolutionized credit in the Brazil largest lending market. The stack includes techs like React, Redux, Redux Saga, Websockets, WebRTC, Jest, Cypress.

### **Senior Software Engineer at Confidential**

May 2018 — August 2018

I had joined the team to break the monolith and create a new front-end stack, focusing on async events on internal systems and on the performance on a public website. The steps include from the concept of the Design System, to create the Single Page Application for the system. I also work on stories based on the core system, developed in Rails.

### **Front-end Engineer at GetNinjas**

June 2017 — May 2018

With thousands of visits per day, the main responsibility was the user experience, getting simple visitors into a new client to our professionals. I had dealt with a monolithic system in Rails, micro-services and day by day, enhancing the ecosystem. After 6 months, we had created a BFF (Back-end For Front-end) system using Node, Express, GraphQL, Apollo and React, a stack focused on performance and continuous integration.

### **Full-stack Developer at Focusnetworks**

May 2016 — May 2017

As a Full-Stack Developer, I had worked with big brands from Brazil and corporate projects for international companies. The stack of the company had included the following technologies: Ruby and Rails (language and framework), PHP (Codeigniter, Wordpress), Javascript (jQuery, AngularJS, Vanilla).

### **Full-stack Developer at Mainde Criativa**

May 2015 — May 2016

I had been there working on each layer in all the internal and external projects as full-stack developer, even simple and performer websites to entire CMS with API integrations.

## **EDUCATION**

### **Computer Science, Estácio**

June 2018 — Dropped

### **Principles of Agile Software Development, ITA**

June 2020
